

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings of claims in the application:

1. (Currently Amended) A method for providing vehicle information for use in servicing a vehicle, comprising the steps of:

entering vehicle identification information into a computerized system;

receiving ~~entering~~ vehicle diagnostic information into the computerized system directly from a vehicle diagnostic equipment;

comparing the received ~~entered~~ vehicle diagnostic information with reference diagnostic information located by using the entered vehicle identification information;

identifying at least one service solution as a result of the comparison;

determining if the at least one service solution is covered by a warranty; and

displaying data as a result of the comparison, the at least one service solution and warranty information.

2 – 4. (Cancelled)

5. (Currently Amended) The method of claim ~~[[4]]~~ 1, wherein the vehicle identifying data includes the make, model and year of the vehicle.

6. (Currently Amended) A system for providing vehicle information for use in servicing a vehicle, comprising:

means for entering vehicle identification information into the system;

means for ~~entering~~ receiving vehicle diagnostic information into the system from a vehicle diagnostic equipment;

means for comparing the ~~entered~~ received vehicle diagnostic information with reference diagnostic information located by using the entered vehicle identification information;

means for identifying at least one service solution as a result of the comparison;

means for determining if the at least one service solution is covered by a warranty;

and

means for displaying data as a result of the comparison, the at least one service solution and warranty information.

7 – 9. (Cancelled)

10. (Currently Amended) The system of claim ~~[[9]]~~ 6, wherein the vehicle identifying data includes the make, model and year of the vehicle.

11. (Currently Amended) A system for providing vehicle information for use in servicing a vehicle, comprising:

a database of referenced vehicle diagnostic information searchable by vehicle identifying data;

a data input wherein vehicle diagnostic data is ~~input~~ inputted into ~~to~~ the system through ~~the data input~~ a connection with a vehicle diagnostic equipment;

a database of service related vehicle information including warranty information; and

a microprocessor that compares the vehicle diagnostic data received through ~~at the data input~~ the vehicle diagnostic equipment with reference diagnostic information from the database and outputs at least one service related solution ~~vehicle data~~ as a result of the comparison including indicating if the at least one solution is covered by a warranty.

12 – 14. (Cancelled)

15. (Currently Amended) The system of claim 11, wherein the vehicle identifying data includes vehicle make, model and year of the vehicle.

16. (Currently Amended) The system of claim 11, wherein the data input is configured to receive ~~receives~~ vehicle diagnostic data over a wireless communications link.

17. (Currently Amended) The system of claim [16] 11, wherein the data input is configured to receive ~~receives~~ vehicle identifying data over a wireless communications link.

18. (Currently Amended) The system of claim 11, wherein the data input is configured to receive ~~receives~~ vehicle diagnostic data using the TCP/IP protocol.
19. (Currently Amended) The system of claim 18, wherein the data input is configured to receive ~~receives~~ vehicle identifying data using the TCP/IP protocol.
20. (New) The method of claim 1, wherein displaying the warranty information includes indicating if the at least one service solution is covered under the warranty.
21. (New) The system of claim 6, wherein the vehicle diagnostic equipment is an onboard monitoring system of the vehicle.
22. (New) The system of claim 6, wherein the vehicle diagnostic equipment is a hand held analyzer.
23. (New) The system of claim of 6, wherein the vehicle diagnostic equipment is directly linked to the means for receiving.
24. (New) The system of claim 6, wherein the means for displaying indicates if the at least one service solution is covered under the warranty.
25. (New) The system of claim 6, wherein the system is contained on a computing device.

26. (New) The system of claim 11, wherein the vehicle diagnostic equipment is an onboard monitoring system of the vehicle.
27. (New) The system of claim 11, wherein the vehicle diagnostic equipment is a hand held analyzer.
28. (New) The system of claim 11, wherein the microprocessor outputs to a display.
29. (New) The system of claim 28, wherein the system the databases, the data input, the microprocessor and display are contained in a computing device.
